BEING TOPPER®

CAPABILITY FOR THE AI ECONOMY

NATIONAL COLLABORATION BRIEF

Building India’s AI-era capability.

AI speeds the work. Your people lead it.

The National AI Capability Initiative works with public bodies, NGOs, foundations, CSR teams and companies across three dimensions of capability: individual, institutional and societal. Each collaboration is designed with the partner.

A BRIEF FOR ORGANISATIONS WORKING AT NATIONAL OR REGIONAL SCALE

ABOUT AND THE NATIONAL QUESTION

AI access is expanding. Readiness remains uneven.

AI adoption is accelerating across sectors. Digital penetration is expanding. Tool access is increasing. Yet structured readiness remains uneven. Being Topper® is a capability-first institution for the digital and AI economy, building judgment, discipline and systems thinking, not shortcuts, and not tool fluency mistaken for expertise.

2013	3	6
FOUNDED	DIMENSIONS	FRAMEWORKS

All six frameworks were exhibited and presented at the India AI Impact Summit & Expo 2026 (16–21 February 2026), Bharat Mandapam, New Delhi, India.

ONE ARCHITECTURE, THREE DIMENSIONS

INDIVIDUAL

AI Career Architecture

How a person stays capable as work changes.

INSTITUTIONAL

Institutional Capability Architecture

What institutions must build to turn AI access into sustained capability.

SOCIETAL

Social Capability Architecture

How society adapts when AI changes work, institutions and the economy.

The three dimensions are not a sequence. National capability is built when all three move together. A collaboration can begin with any one of them.

WHAT WE HOLD TO

Capability over credentials

A certificate tells you someone attended. Capability tells you someone can do the work.

Using AI is not building AI

Comfort with a tool is not capability. Our maturity model makes the difference precise.

Depth over breadth

One real capability, built and shown, is worth more than ten shallow ones.

What this is not. Not a government or official programme. No endorsement or partnership with any public body is claimed. We do not promise jobs, income or timelines. Capability is what we build. What people do with it is theirs.

Founded by Vipin Khuttel, Institutional Digital and AI Capability Architect.

WAYS TO COLLABORATE

Six ways to begin, and to build.

Any can be the first step, and they can be combined as results become visible. Formats are indicative and are agreed with the partner.

01 · DIALOGUE

National or Regional Capability Dialogue

A structured conversation on AI-era capability readiness, at national, regional or sector level.

FORMAT, INDICATIVE
One structured session, or a short series

THE PARTNER KEEPS
A dialogue summary note

Enquire about this collaboration →

02 · POLICY

Policy and Readiness Consultation

Applying the framework to a readiness question a public or sector team is already working on.

FORMAT, INDICATIVE
A scoped working engagement

THE PARTNER KEEPS
A readiness brief for the team

Enquire about this collaboration →

03 · PUBLIC PROGRAMMES

Public-Programme Workshop or Training

Hands-on sessions for teams that deliver public or sector programmes, built around real work.

FORMAT, INDICATIVE
One to two days

THE PARTNER KEEPS
Participant outputs and a practice guide

Enquire about this collaboration →

04 · LEADERSHIP

Leadership Orientation Seminar

AI capability orientation for senior leaders and decision-makers: what to ask, what to check, what to decide.

FORMAT, INDICATIVE
A half-day briefing

THE PARTNER KEEPS
A briefing note and a short list of decisions

Enquire about this collaboration →

05 · CSR AND FOUNDATIONS

CSR or Foundation-Supported Programme

A capability programme with clear scope, dates and reporting, supported by a CSR team or foundation.

FORMAT, INDICATIVE
Scoped with the partner

THE PARTNER KEEPS
A dated programme report

Enquire about this collaboration →

06 · ADOPTION

Framework Adoption Support

Help adapting the framework to a partner's own audience, language and context.

FORMAT, INDICATIVE
Scoped with the partner

THE PARTNER KEEPS
The framework adapted to the partner's audience

Enquire about this collaboration →

Another requirement? Choose "Other Collaboration" on the enquiry form. Each link opens the form with the category pre-selected.

HOW A COLLABORATION WORKS

A structured process, agreed in writing.

01
Submit an enquiry
Choose a category and share your organisation's context.

02
Review
The team reviews the enquiry for fit and alignment.

03
Discussion
Suitable organisations may be invited to discuss audience, scope and format.

04
Collaboration
Any collaboration is agreed in writing and delivered with Being Topper.

Agreed with the partner

- Scope, audience and duration
- Certification, if any
- Commercial terms
- Delivery arrangements and venue

None of these is implied as included.

What we ask of the partner

- A named lead contact
- A host office for scheduling and communication
- The audience or team to include
- Any existing AI or policy documents to build on

How capability is reported

We report capability levels against the Digital & AI Capability Maturity Model™ and the quality of work produced, with dates and what each number counts. We do not report promises.

Data handling

Participant data is handled in line with the Digital Personal Data Protection Act, 2023 and the partner's own data policy. Reporting is at group level.

WHAT THIS DOES NOT CLAIM

- Not a government or official programme
- No public body is named, and no endorsement or partnership is claimed
- No institution is described as having adopted it nationally
- No promise of employment, income or business growth
- No partner is named without written consent
- An enquiry does not guarantee a collaboration

QUESTIONS PARTNERS ASK

Is this a government programme?
No. It is an initiative of Being Topper. The framework is designed with India's national AI and skilling priorities in mind.

Can we start small?
Yes. A leadership briefing, a single workshop or a dialogue can each be the first step.

What does it cost?
Terms are proposed separately, after scope is agreed with the partner.

BEGIN A NATIONAL COLLABORATION

Tell us about your organisation.

Submit an enquiry and tell us which collaboration you are exploring. The team will review it for fit, and suitable organisations may be contacted to explore the next step.
